TOTAL OPPORTUNITY

Data source: POS exports · 90-day rolling window

The platform runs three engines. Here's what you'd make in your first year if you used all three. The first column is our **conservative baseline — that's what we plan around**. The other two are upside as your adoption deepens.

YEAR 1 FINANCIAL IMPACT AT THE CONSERVATIVE SCENARIO

$149,505

CONSERVATIVE · OUR BASELINE	MODERATE	BEST CASE
25% CR · 25% consign · 1% AP	50% CR · 50% consign · 2% AP	75% CR · 75% consign · 3% AP
$149,505	**$295,530**	**$441,555**

1	2	3
CREDIT RECOVERY	CONSIGNMENT WORKING CAPITAL	AP MANAGEMENT
$67,750/yr	**$54,336**	**$27,419/yr**
recurring	*one-time*	*recurring*

Bottom-Line Impact

What that combined number is worth as a % of your annual revenue.

EBITDA IMPROVEMENT

+22.3%

from 15% to 18.3%

**The Year 1 number adds three things: yearly credit recovery + yearly AP savings + a one-time cash recovery from moving half your inventory to consignment. The yearly stuff repeats every year. The consignment piece is a one-time cash bump. EBITDA math assumes a 15% baseline — typical for cannabis retail. Numbers are before our fees (see pricing page on the back).*

Learn More

1. CREDIT RECOVERY

Two ways to get money back from your vendors. First: every time you sold their product below target margin (sale, discount, slow mover), they help cover the gap. Second: every time their product was returned, expired, or had to be tossed, they cover the cost. Both end up on one monthly credit memo the platform builds and you send to each vendor.

ANNUALIZED CREDIT RECOVERY OPPORTUNITY

$271,000

CO-MARKETING

7,865 of 20,761 txns (37.9%) closed below your 50% target.

VENDOR	ANNUAL UPSIDE
Vendor A	**$65,364**
Vendor B	**$51,210**
Vendor C	**$36,931**
Vendor D	**$22,721**
Vendor E	**$12,312**

RETURNS & WASTE

116 return / waste events · $3,250 cost basis

VENDOR	ANNUAL CREDIT
Vendor C	**$3,425**
Vendor A	**$2,882**
Vendor B	**$1,851**
Vendor D	**$1,338**
Vendor F	**$913**

25% APPROVAL · BASELINE	50% APPROVAL · MODERATE	75% APPROVAL · BEST CASE
$67,750/yr	**$135,500/yr**	**$203,250/yr**

**Vendors don't have to say yes — but they almost always do, because they want to keep their spot on your shelf. And credit recovery is billed only on what's recovered — a flat $20 per credit memo, free to start.*

2. CONSIGNMENT CONVERSION OPPORTUNITY

Right now you've sunk $217,342 into product sitting on your shelves across 35 vendors you stock today. Consignment flips that — the vendor owns the product until you sell it, so you only pay when it rings up at the register. Convert some of your vendors and the cash you've already spent on their inventory comes back to your bank account.

WHERE THE CASH IS CONCENTRATED — YOUR TOP 3 VENDORS BY INVENTORY VALUE

VENDOR	INVENTORY ON HAND	% OF TOTAL	BANK IMPACT
Vendor C	$45,822	21.1%	$45,822
Vendor B	$31,811	14.6%	$31,811
Vendor F	$24,525	11.3%	$24,525
Top 3 combined	**$102,159**	**47.0%**	**$102,159**

Your buyer talks to the vendors — those relationships are theirs. The platform gives them the data and the consignment system underneath, and runs the weekly math (category splits, aging discounts, returns) so you and the vendor see the same numbers and there's nothing to argue about.

**The cash comes back over your normal restocking cycle (usually 30-60 days) as you stop buying new inventory wholesale and start receiving it on consignment. Some vendors might take their existing inventory back right away, but don't count on it.*

3. ACCOUNTS PAYABLE MANAGEMENT

Right now, every invoice eats your team's time. Open the email, match it to what actually showed up, hunt down the missing manifest, key it into QuickBooks, get it approved, cut the check, answer the vendor's follow-up email a week later. The platform replaces all of that. The invoice gets parsed when it lands. The platform checks it against Metrc line by line. You click approve and send. The vendor checks their own portal for status — your team doesn't field the call.

VENDORS	PRODUCTS	MONTHLY INVOICES	MONTHLY EMAILS

116 hrs at $30/hr	*1% of $2,393,946/yr volume · baseline*

Combined Year 1 AP Impact

Hours your team gets back + dollars you stop overpaying.

$27,419

1% CAPTURE · BASELINE	2% CAPTURE · MODERATE	3% CAPTURE · BEST CASE
$27,419/yr	**$51,359/yr**	**$75,298/yr**

**Hours saved math: $30/hr AP labor × 10 minutes saved per invoice (industry standard — manual flow vs one-click). Error savings: industry research shows 2-5% of invoice dollars are wrong (pricing errors, quantity errors, items billed but never shipped). Metrc line-by-line catches them. Your buyer still owns vendor relationships — the platform hands them the parsed invoice and the Metrc proof, and they have the conversation.*

HOW IT WORKS

The platform does the grind. You keep the profits.

ShelfSpace isn't another portal to log into, or another dashboard your team has to learn. It's a system you drive — strong software and AI, backed by a small team of humans — that takes the grind off your plate. Three big burdens:

1. **Accounts Payable, off your plate.**
Every vendor invoice gets parsed the moment it lands. The platform matches it to Metrc, catches the errors, and generates a Check 21 payment; ShelfiQ answers the vendor follow-up emails. You click approve and send — that's it. Your AP person stops being a full-time AP person.

2. **Credit Recovery, off your plate.**
Every month the platform combs through your sales, returns, destruction, discounts, and aging markdowns, and builds a credit memo for each vendor with line-item proof. You review and send; ShelfiQ handles the vendor conversation and executes their decision. Approved credits land back on your books, applied to your next vendor payment.

3. **Consignment, off your plate.**
The platform handles the math, the splits, the aging discounts, and the return credits, and generates the weekly check to each vendor for you to send. Your buyer owns the vendor relationships; the platform runs the engine. No spreadsheets, no settlement disputes, no wondering if the vendor got paid.

The bottom line:

You make significantly more money. Your team gets their time back. Your books get cleaner. Your vendors get paid on time and stop calling. You get to focus on the parts of your business — and your life — that actually matter to you.

It's a no-brainer.

PRICING & NEXT STEP

We recommend Core AP + Credit Recovery. It's our most popular plan and almost always the best deal. Here's the whole picture:

MOST POPULAR · OUR RECOMMENDATION

Core AP + Credit Recovery

YEAR 1 SAVINGS

$149,505

conservative, before fees

$20 per artifact — each vendor payment and each recovered credit memo

Free to start. No subscription, no commission — you keep 100% of every credit recovered.

$149,505 in conservative savings. Fees are a flat $20 per artifact — each vendor payment and each recovered credit memo — with no subscription and no percentage of what's recovered. Volume discounts apply.

- **Accounts Payable, handled.** Vendor inbox with ShelfiQ AI replies, invoice accuracy verified against Metrc and POs, Check 21-compliant digital payments, free vendor portals, real-time QuickBooks sync.
- **Credit Recovery.** Returns, destruction, co-marketing, and aging markdowns recovered with line-item proof. ShelfiQ runs the vendor conversation; approved credits apply to your next vendor payment.
- **Live AP dashboard.** Every dollar in flight, every vendor's status, every credit waiting to apply — one screen, no spreadsheets.
- **Your team focused where it matters.** The hours your team spent chasing invoices, matching manifests, and fielding vendor calls go back to higher-leverage work — merchandising, smarter buying, customer experience, the things that actually grow your top line.

No contracts, cancel any time.

START WITH CREDIT RECOVERY, OR RUN THE WHOLE ENGINE

Same simple pricing either way. Whether you run credit recovery on its own or add accounts payable and consignment, it's $20 per artifact — each vendor payment, each recovered credit memo — with no subscription and no percentage of what's recovered. Volume discounts apply, and it's free to start: your evaluation costs nothing, and you only pay once the platform produces an artifact.

What you get: AP handled end-to-end, ShelfiQ answering routine vendor email, credits applied to your bills, and one live dashboard tracking every dollar in flight — all on flat per-artifact pricing.

A NOTE FROM THE FOUNDER

Chris Mitchem

Founder & CEO

I've been a cannabis operator since 2015, and I have the scars to prove it. ShelfSpace is the product of everything I learned the hard way. The savings here are real — give us a shot.
